(54) Title: CONTAINER AND METHOD FOR THE TRANSPORT AND PNEUMATIC CONVEYING OF BULK POWDERS

(57) **Abstract:** An elongate container (7) for the transport of bulk powders is provided along its base with a longitudinally sloping membrane support. A gas permeable membrane (11) is mounted on the support and the support is itself unsupported relative to the container between its longitudinal and transverse ends. A method of conveying bulk powder using such a container is also described.
